Maxirig Goods Cages

Designed and manufactured strictly in accordance with Australian Standards, Maxirig workboxes and goods cages are amongst the toughest available. Available in a variety of configurations including forklift work platforms, crane suspended man cages and crane suspended rescue cages. There is sure to be one that meets the needs of any work place. Each unit is constructed from heavy duty steel and supplied with a proof load test certificate, magnetic particle inspection report, certificate of conformance with the relevant Australian Standard and, importantly all personnel cages carry design registration with the Australian work place safety authorities.
