

Ti TAN Electric Builder's Hoist

PRODUCT USAGE

The Electric Builder's Hoist is designed for building sites and various construction workplaces such as warehousing, buildings, storage areas, elevator liftwell maintenance, factories in general, as well as domestic applications.

FEATURES

- Compact and lightweight design which allows easy mounting.
- Automatic stop switch to avoid over-winding of the rope.
- A reverse-winding limit lever.
- Double safety brake device including an electromagnet brake for instant braking.
- Operates on single phase 240 volt power supply.
- 360° universal joint saddle with safety hook.
- Hand held control pendant with safety switch.
- Optional mounting arm bracket.
- Spare parts available.
